JOURNAL OF Inorganic Biochemistry

www.elsevier.com/locate/jinorgbio

Subject Index of Volume 88

Albumin
studies of the binding of a series of platinum(IV) complexes to plasma proteins, 260
^{27}Al NMR
in vivo and in vitro ^{27}Al NMR studies of aluminum(III) chelates of triazacyclononane polycarboxylate ligands, 1
Aluminum chelates
in vivo and in vitro ^{27}Al NMR studies of aluminum(III) chelates of triazacyclononane polycarboxylate ligands, 1
Aluminum complexes
potentiometric and ^{1}H NMR studies of complexation of Al^{3+} with (−)-epigallocatechin gallate, a major active constituent of green tea, 7
Aluminum
synthesis of feralex a novel aluminum/iron chelating compound, 19
Amicyanin
an outer-sphere hydrogen-bond network constrains copper coordination in blue proteins (Focused Review), 375
Aminoethanol complexes
(aminoethanol)dichloroplatinum(II) complexes: influence of the hydroxyethyl moiety on 5′-GMP and DNA binding, intramolecular stability, the partition coefficient and anticancer activity, 254
Anion
histidine pK_a values for the N-lobe of human transferrin: effect of substitution of binding site Asp by Ser (D63S), 403
Anti-inflammatory drugs
three new vanadyl(IV) complexes with non-steroidal anti-inflammatory drugs (Ibuprofen, Naproxen and Tolmetin). Bioactivity on osteoblast-like cells in culture, 94
Anticancer complexes
studies of the binding of a series of platinum(IV) complexes to plasma proteins, 260
Antiproliferative activity
antiproliferative activity of mixed-ligand dien-Cu(II) complexes with thiazole, thiazoline and imidazole derivatives, 25
L-Arginine
interaction of anions with rat liver arginase: specific inhibitory effects of fluoride, 397
Aragonite
electron diffraction studies of the calcareous skeletons of bryozoans, 410
Au-protein
gold helps bacteria to oxidize methane (Short Communication), 251
Auranofin
comparative ^{13}C and ^{31}P NMR studies of the ligand exchange reactions of auranofin with ergothionine, imidazolidine-2-thione and diazinane-2-thione, 53
^{13}C, ^{31}P and ^{15}N NMR studies of the ligand exchange reactions of auranofin and chloro(triethylphosphine)gold(I) with thiourea, 44
Azurin
an outer-sphere hydrogen-bond network constrains copper coordination in blue proteins (Focused Review), 375
Binding kinetics
kinetics of conformational changes induced by the binding of various metal ions to bovine α-lactalbumin, 69
Biomineralization
electron diffraction studies of the calcareous skeletons of bryozoans, 410
Bioreduction
studies of the binding of a series of platinum(IV) complexes to plasma proteins, 260
Bis(6-ethylpicolinato)oxovanadium(IV)
bis(6-ethylpicolinato)oxovanadium(IV) complex with normoglycemic activity in KK-A^{y} mice, 108
Blue copper proteins (Focused Review)
an outer-sphere hydrogen-bond network constrains copper coordination in blue proteins, 375
Brownian simulation
electron transfer between cytochrome b_5 and some oxidised haemoglobins: the role of ionic strength, 328
Bryozoa
electron diffraction studies of the calcareous skeletons of bryozoans, 410
Cadmium
application of metallothionein null cells to investigation of cadmium transport, 207
cell surface display of synthetic phytochelatins using ice nucleation protein for enhanced heavy metal bioaccumulation, 223
folding pathway of apo-metallothionein induced by Zn^{2+}, Cd^{2+} and Co^{2+}, 144
germ cell-specific nucleocytoplasmic shuttling protein, tesmin, responsive to heavy metal stress in mouse testes, 183
Calcite
electron diffraction studies of the calcareous skeletons of bryozoans, 410
Capillary electrophoresis (CE)
recent developments in quantification methods for metallothionein, 123
Capillary zone electrophoresis
investigation of metal complexes with metallothionein in rat tissues by hyphenated techniques, 197
Carbohydrate complexes
binding ability of sialic acid towards biological and toxic metal ions. NMR, potentiometric and spectroscopic study, 61
Carotenoids
a supramolecular enzyme model catalyzing the central cleavage of carotenoids, 295
Ca^{2+}-site
kinetics of conformational changes induced by the binding of various metal ions to bovine α-lactalbumin, 69
Catechins
potentiometric and ^{1}H NMR studies of complexation of Al^{3+} with (−)-epigallocatechin gallate, a major active constituent of green tea, 7
Catechol dioxygenases
(catecholato)iron(III) complexes: structural and functional models

Elsevier Science Inc.
PII: S0162-0134(02)00385-9

for the catechol-bound iron(III) form of catechol dioxygenases (Focused Review), 284
(Catecholato)iron(III) complexes
(catecholato)iron(III) complexes: structural and functional models for the catechol-bound iron(III) form of catechol dioxygenases (Focused Review), 284
^{113}Cd NMR
dynamics of interdomain and intermolecular interactions in mammalian metallothioneins, 135
Ceruloplasmin
roles of metallothionein in copper homeostasis: responses to Cu-deficient diets in mice, 173
Chelation
synthesis of feralex a novel aluminum/iron chelating compound, 19
Chelator
synthesis of feralex a novel aluminum/iron chelating compound, 19
Chemical system
the fundamental nature of life as a chemical system: the part played by inorganic elements (Focused Review), 241
Chloro(triethylphosphine)gold(I)
^{13}C, ^{31}P and ^{15}N NMR studies of the ligand exchange reactions of auranofin and chloro(triethylphosphine)gold(I) with thiourea, 44
Chloroperoxidase compound
resonance Raman spectroscopy and density functional theoretical calculations of manganese corroles, 113
Chlorophyll
aluminum corrolin, a novel chlorophyll analogue (Short Communication), 305
Chromatography
recent developments in quantification methods for metallothionein, 123
Cisplatin
(aminoethanol)dichloroplatinum(II) complexes: influence of the hydroxyethyl moiety on 5′-GMP and DNA binding, intramolecular stability, the partition coefficient and anticancer activity, 254
Clusters
folding pathway of apo-metallothionein induced by Zn^{2+}, Cd^{2+} and Co^{2+}, 144
Cobalt
folding pathway of apo-metallothionein induced by Zn^{2+}, Cd^{2+} and Co^{2+}, 144
Colon cancer
antiproliferative activity of mixed-ligand dien-Cu(II) complexes with thiazole, thiazoline and imidazole derivatives, 25
Complex formation
a scanning tunneling microscopy (STM) investigation of complex formation between cytochrome $P450_{cam}$ and putidaredoxin, 362
Copper
an outer-sphere hydrogen-bond network constrains copper coordination in blue proteins (Focused Review), 375
copper speciation in the α and β domains of recombinant human metallothionein by electrospray ionization mass spectrometry, 153
reduction of copper and metallothionein in *toxic milk* mice by tetrathiomolybdate, but not deferiprone, 213
role of a copper-specific metallothionein of the blue crab, *Callinectes sapidus*, in copper metabolism associated with degradation and synthesis of hemocyanin, 228
roles of metallothionein in copper homeostasis: responses to Cu-deficient diets in mice, 173
Copper chaperone
role for zinc(II) in the copper(I) regulated protein CopY, 192
roles of metallothionein in copper homeostasis: responses to Cu-deficient diets in mice, 173
Copper complexes
antiproliferative activity of mixed-ligand dien-Cu(II) complexes with thiazole, thiazoline and imidazole derivatives, 25
Copper deficiency
roles of metallothionein in copper homeostasis: responses to Cu-deficient diets in mice, 173
Copper uptake
role of a copper-specific metallothionein of the blue crab, *Callinectes sapidus*, in copper metabolism associated with degradation and synthesis of hemocyanin, 228
Copper(II)
interaction of copper(II) with imidazole pyridine nitrogen-containing ligands in aqueous medium: a spectroscopic study, 37
Copper(II) complexes
crystal structure of [Cu(*N*-quinolin-8-yl-*p*-toluenesulfonamidate)$_2$]: study of its interaction with DNA and hydrogen peroxide, 101
Copper,zinc–superoxide dismutase
roles of metallothionein in copper homeostasis: responses to Cu-deficient diets in mice, 173
CopY
role for zinc(II) in the copper(I) regulated protein CopY, 192
Crystal structure
crystal structure of [Cu(*N*-quinolin-8-yl-*p*-toluenesulfonamidate)$_2$]: study of its interaction with DNA and hydrogen peroxide, 101
Crystallography
electron diffraction studies of the calcareous skeletons of bryozoans, 410
Cu coordination geometry
coordination geometry of Cu-porphyrin in Cu(II)–Fe(II) hybrid hemoglobins studied by Q-band EPR and resonance Raman spectroscopies, 310
Cu(I)
role for zinc(II) in the copper(I) regulated protein CopY, 192
Cu(II)–Fe(II) hybrid Hb
coordination geometry of Cu-porphyrin in Cu(II)–Fe(II) hybrid hemoglobins studied by Q-band EPR and resonance Raman spectroscopies, 310
Cu_n–O_2 reactivity
frontier molecular orbital analysis of Cu_n–O_2 reactivity, 368
Cyanide
^{13}C, ^{31}P and ^{15}N NMR studies of the ligand exchange reactions of auranofin and chloro(triethylphosphine)gold(I) with thiourea, 44
β-Cyclodextrin
a supramolecular enzyme model catalyzing the central cleavage of carotenoids, 295
Cysteine
studies of the binding of a series of platinum(IV) complexes to plasma proteins, 260
Cytochrome $P450_{cam}$
a scanning tunneling microscopy (STM) investigation of complex formation between cytochrome $P450_{cam}$ and putidaredoxin, 362
Cytochrome b_5
electron transfer between cytochrome b_5 and some oxidised haemoglobins: the role of ionic strength, 328
Cytochrome c
pseudomonas aeruginosa cytochrome C_{551}: probing the role of the hydrophobic patch in electron transfer, 353
Cytochrome aa_3
ligand binding reveals protonation events at the active site of cytochrome *c* oxidase: is the K-pathway used for the transfer of H^+ or OH^-?, 335
Cytotoxicity
(aminoethanol)dichloroplatinum(II) complexes: influence of the hydroxyethyl moiety on 5′-GMP and DNA binding, intramolecular stability, the partition coefficient and anticancer activity, 254
Decontamination
cell surface display of synthetic phytochelatins using ice nucleation protein for enhanced heavy metal bioaccumulation, 223

Deferiprone
reduction of copper and metallothionein in *toxic milk* mice by tetrathiomolybdate, but not deferiprone, 213
Density functional calculations
frontier molecular orbital analysis of Cu_n–O_2 reactivity, 368
Density functional theoretical calculations
resonance Raman spectroscopy and density functional theoretical calculations of manganese corroles, 113
Di-haem protein
sequential unfolding of the two-domain protein *Pseudomonas stutzeri* cytochrome c_4, 316
Di-manganese complexes
interaction of anions with rat liver arginase: specific inhibitory effects of fluoride, 397
Diazinane-2-thione
comparative ^{13}C and ^{31}P NMR studies of the ligand exchange reactions of auranofin with ergothionine, imidazolidine-2-thione and diazinane-2-thione, 53
Dien
antiproliferative activity of mixed-ligand dien-Cu(II) complexes with thiazole, thiazoline and imidazole derivatives, 25
Dimerization
dynamics of interdomain and intermolecular interactions in mammalian metallothioneins, 135
Dimer
metallothionein dimers studied by nano-spray mass spectrometry, 119
DMT1
application of metallothionein null cells to investigation of cadmium transport, 207
DNA interaction
crystal structure of [Cu(*N*-quinolin-8-yl-*p*-toluenesulfonamidate)$_2$]: study of its interaction with DNA and hydrogen peroxide, 101
DNA
(aminoethanol)dichloroplatinum(II) complexes: influence of the hydroxyethyl moiety on 5′-GMP and DNA binding, intramolecular stability, the partition coefficient and anticancer activity, 254
α domains
copper speciation in the α and β domains of recombinant human metallothionein by electrospray ionization mass spectrometry, 153
β domains
copper speciation in the α and β domains of recombinant human metallothionein by electrospray ionization mass spectrometry, 153
Dynamics of ^{57}Fe
the dynamics of ^{57}Fe nuclei in Fe^{III}–DNA condensates, 14
Dynamics
dynamics of interdomain and intermolecular interactions in mammalian metallothioneins, 135
Electrochemistry
recent developments in quantification methods for metallothionein, 123
Electron transfer
electron transfer between cytochrome b_5 and some oxidised haemoglobins: the role of ionic strength, 328
ligand binding reveals protonation events at the active site of cytochrome *c* oxidase; is the K-pathway used for the transfer of H^+ or OH^-?, 335
Pseudomonas aeruginosa cytochrome C_{551}: probing the role of the hydrophobic patch in electron transfer, 353
Electrospray MS
investigation of metal complexes with metallothionein in rat tissues by hyphenated techniques, 197
Electrospray mass spectrometry
metallothionein dimers studied by nano-spray mass spectrometry, 119
Endoplasmic reticulum
role of a copper-specific metallothionein of the blue crab, *Callinectes sapidus*, in copper metabolism associated with degradation and synthesis of hemocyanin, 228
Enterococcus hirae
role for zinc(II) in the copper(I) regulated protein CopY, 192
Enzyme model
a supramolecular enzyme model catalyzing the central cleavage of carotenoids, 295
EPR
coordination geometry of Cu-porphyrin in Cu(II)–Fe(II) hybrid hemoglobins studied by Q-band EPR and resonance Raman spectroscopies, 310
Ergothionine
comparative ^{13}C and ^{31}P NMR studies of the ligand exchange reactions of auranofin with ergothionine, imidazolidine-2-thione and diazinane-2-thione, 53
Extended X-ray absorption fine structure
solution structural studies of molybdate–nucleotide polyanions, 274
Fe^{III}–DNA condensates
the dynamics of ^{57}Fe nuclei in Fe^{III}–DNA condensates, 14
Feralex
synthesis of feralex a novel aluminum/iron chelating compound, 19
Fluorescence
aluminum corrolin, a novel chlorophyll analogue (Short Communication), 305
Formation constants
potentiometric and ^1H NMR studies of complexation of Al^{3+} with (−)-epigallocatechin gallate, a major active constituent of green tea, 7
Frontier molecular orbital
frontier molecular orbital analysis of Cu_n–O_2 reactivity, 368
Functional models
(catecholato)iron(III) complexes: structural and functional models for the catechol-bound iron(III) form of catechol dioxygenases (Focused Review), 284
Fusarium oxysporum
isotope effects and intermediates in the reduction of NO by $P450_{NOR}$, 343
Gating
ligand binding reveals protonation events at the active site of cytochrome *c* oxidase; is the K-pathway used for the transfer of H^+ or OH^-?, 335
GMP
(aminoethanol)dichloroplatinum(II) complexes: influence of the hydroxyethyl moiety on 5′-GMP and DNA binding, intramolecular stability, the partition coefficient and anticancer activity, 254
Gold(I)
comparative ^{13}C and ^{31}P NMR studies of the ligand exchange reactions of auranofin with ergothionine, imidazolidine-2-thione and diazinane-2-thione, 53
Goldphilic bacteria
gold helps bacteria to oxidize methane (Short Communication), 251
H-bonding
crystal packing and hydrogen bonding in platinum(II) nucleotide complexes: X-ray crystal structure of [Pt($MeSCH_2CH_2SMe$)(5′-GMP-*N*7)$_2$]·$6H_2O$, 268
Haemoglobin
electron transfer between cytochrome b_5 and some oxidised haemoglobins: the role of ionic strength, 328
Heavy metal removal
cell surface display of synthetic phytochelatins using ice nucleation protein for enhanced heavy metal bioaccumulation, 223
Heme
aluminum corrolin, a novel chlorophyll analogue, 305

Heme-thiolate catalysis
isotope effects and intermediates in the reduction of NO by $P450_{NOR}$, 343
Hemocyanin
role of a copper-specific metallothionein of the blue crab, *Callinectes sapidus*, in copper metabolism associated with degradation and synthesis of hemocyanin, 228
High performance liquid chromatography (HPLC)
recent developments in quantification methods for metallothionein, 123
Histidine
histidine pK_a values for the N-lobe of human transferrin: effect of substitution of binding site Asp by Ser (D63S), 403
Horseradish peroxidase compound
resonance Raman spectroscopy and density functional theoretical calculations of manganese corroles, 113
Hydride transfer
isotope effects and intermediates in the reduction of NO by $P450_{NOR}$, 343
Hydrophobic patch
Pseudomonas aeruginosa cytochrome C_{551}: probing the role of the hydrophobic patch in electron transfer, 353
Hyphenated techniques
investigation of metal complexes with metallothionein in rat tissues by hyphenated techniques, 197
ICP-MS
investigation of metal complexes with metallothionein in rat tissues by hyphenated techniques, 197
Imidazole-containing ligands
interaction of copper(II) with imidazole pyridine nitrogen-containing ligands in aqueous medium: a spectroscopic study, 37
Imidazoles
antiproliferative activity of mixed-ligand dien-Cu(II) complexes with thiazole, thiazoline and imidazole derivatives, 25
Imidazolidine-2-thione
comparative ^{13}C and ^{31}P NMR studies of the ligand exchange reactions of auranofin with ergothionine, imidazolidine-2-thione and diazinane-2-thione, 53
Immunochemistry
recent developments in quantification methods for metallothionein, 123
Inorganic elements
the fundamental nature of life as a chemical system: the part played by inorganic elements (Focused Review), 241
Insulin-mimetic activity
bis(6-ethylpicolinato)oxovanadium(IV) complex with normoglycemic activity in KK-A^y mice, 108
Ionic strength
electron transfer between cytochrome b_5 and some oxidised haemoglobins: the role of ionic strength, 328
Iron
application of metallothionein null cells to investigation of cadmium transport, 207
synthesis of feralex a novel aluminum/iron chelating compound, 19
KK-A^y mouse
bis(6-ethylpicolinato)oxovanadium(IV) complex with normoglycemic activity in KK-A^y mice, 108
α-Lactalbumin
kinetics of conformational changes induced by the binding of various metal ions to bovine α-lactalbumin, 69
Luminescence
synthesis and photophysical study of highly luminescent coordination compounds of rare earth ions with thenoyltrifluoroacetonate and AZT, 87
Manganese
application of metallothionein null cells to investigation of cadmium transport, 207
Manganese corroles
resonance Raman spectroscopy and density functional theoretical calculations of manganese corroles, 113
Mass spectrometry
copper speciation in the α and β domains of recombinant human metallothionein by electrospray ionization mass spectrometry, 153
Mass spectrometry (MS)
recent developments in quantification methods for metallothionein, 123
Mercury
cell surface display of synthetic phytochelatins using ice nucleation protein for enhanced heavy metal bioaccumulation, 223
Metal binding
kinetics of conformational changes induced by the binding of various metal ions to bovine α-lactalbumin, 69
Metal complexes
binding ability of sialic acid towards biological and toxic metal ions. NMR, potentiometric and spectroscopic study, 61
Metal site
the metal site as a template for the metalloprotein structure formation, 77
Metal-thiolate
role for zinc(II) in the copper(I) regulated protein CopY, 192
Metal-thiolate clusters
advances in the structure and chemistry of metallothioneins (Focused Review), 388
Metallocorroles
resonance Raman spectroscopy and density functional theoretical calculations of manganese corroles, 113
Metalloenzymes
interaction of anions with rat liver arginase: specific inhibitory effects of fluoride, 397
Metalloporphyrins
resonance Raman spectroscopy and density functional theoretical calculations of manganese corroles, 113
Metalloprotein
metallothionein dimers studied by nano-spray mass spectrometry, 119
the metal site as a template for the metalloprotein structure formation, 77
Metalloregulation
role for zinc(II) in the copper(I) regulated protein CopY, 192
Metallothionein messenger RNA (MT mRNA)
recent developments in quantification methods for metallothionein, 123
Metallothionein
advances in the structure and chemistry of metallothioneins, 388
application of metallothionein null cells to investigation of cadmium transport, 207
dynamics of interdomain and intermolecular interactions in mammalian metallothioneins, 135
folding pathway of apo-metallothionein induced by Zn^{2+}, Cd^{2+} and Co^{2+}, 144
germ cell-specific nucleocytoplasmic shuttling protein, tesmin, responsive to heavy metal stress in mouse testes, 183
metallothionein dimers studied by nano-spray mass spectrometry, 119
recent developments in quantification methods for metallothionein, 123
role of a copper-specific metallothionein of the blue crab, *Callinectes sapidus*, in copper metabolism associated with degradation and synthesis of hemocyanin, 228
roles of metallothionein in copper homeostasis: responses to Cu-deficient diets in mice, 173
Metals
recent developments in quantification methods for metallothionein, 123
Methane oxidation
gold helps bacteria to oxidize methane (Short Communication), 251

Microsomes
role of a copper-specific metallothionein of the blue crab, *Callinectes sapidus*, in copper metabolism associated with degradation and synthesis of hemocyanin, 228
Molt cycle
role of a copper-specific metallothionein of the blue crab, *Callinectes sapidus*, in copper metabolism associated with degradation and synthesis of hemocyanin, 228
Molybdate–nucleotide interactions
solution structural studies of molybdate–nucleotide polyanions, 274
MRNA
role of a copper-specific metallothionein of the blue crab, *Callinectes sapidus*, in copper metabolism associated with degradation and synthesis of hemocyanin, 228
Multitracer
application of metallothionein null cells to investigation of cadmium transport, 207
NANA
binding ability of sialic acid towards biological and toxic metal ions. NMR, potentiometric and spectroscopic study, 61
Nanospray
metallothionein dimers studied by nano-spray mass spectrometry, 119
Nature of life
the fundamental nature of life as a chemical system: the part played by inorganic elements (Focused Review), 241
Nitric oxide
isotope effects and intermediates in the reduction of NO by $P450_{NOR}$, 343
NMR
comparative ^{13}C and ^{31}P NMR studies of the ligand exchange reactions of auranofin with ergothionine, imidazolidine-2-thione and diazinane-2-thione, 53
histidine pK_a values for the N-lobe of human transferrin: effect of substitution of binding site Asp by Ser (D63S), 403
potentiometric and ^1H NMR studies of complexation of Al^{3+} with (−)-epigallocatechin gallate, a major active constituent of green tea, 7
^{13}C, ^{31}P and ^{15}N NMR studies of the ligand exchange reactions of auranofin and chloro(triethylphosphine)gold(I) with thiourea, 44
NMR spectroscopy
dynamics of interdomain and intermolecular interactions in mammalian metallothioneins, 135
Noncovalent complexes
metallothionein dimers studied by nano-spray mass spectrometry, 119
Nramp
application of metallothionein null cells to investigation of cadmium transport, 207
Nuclear magnetic resonance
solution structural studies of molybdate–nucleotide polyanions, 274
Nucleocytoplasmic translocation
germ cell-specific nucleocytoplasmic shuttling protein, tesmin, responsive to heavy metal stress in mouse testes, 183
Nucleotide
crystal packing and hydrogen bonding in platinum(II) nucleotide complexes: X-ray crystal structure of $[Pt(MeSCH_2CH_2SMe)(5'\text{-GMP-}N7)_2]\cdot 6H_2O$, 268
5′- and 3′-nucleotide monophosphates
solution structural studies of molybdate–nucleotide polyanions, 274
Osteoblast proliferation
three new vanadyl(IV) complexes with non-steroidal anti-inflammatory drugs (Ibuprofen, Naproxen and Tolmetin). Bioactivity on osteoblast-like cells in culture, 94
P450 enzymes
isotope effects and intermediates in the reduction of NO by $P450_{NOR}$, 343
Pentamolybdodiphosphates
solution structural studies of molybdate–nucleotide polyanions, 274
Platinum(IV)
studies of the binding of a series of platinum(IV) complexes to plasma proteins, 260
Platinum
crystal packing and hydrogen bonding in platinum(II) nucleotide complexes: X-ray crystal structure of $[Pt(MeSCH_2CH_2SMe)(5'\text{-GMP-}N7)_2]\cdot 6H_2O$, 268
Porphyrinoids
aluminum corrolin, a novel chlorophyll analogue (Short Communication), 305
Productive complex
Pseudomonas aeruginosa cytochrome C_{551}: probing the role of the hydrophobic patch in electron transfer, 353
Protein folding
folding pathway of apo-metallothionein induced by Zn^{2+}, Cd^{2+} and Co^{2+}, 144
Protein purification
role of a copper-specific metallothionein of the blue crab, *Callinectes sapidus*, in copper metabolism associated with degradation and synthesis of hemocyanin, 228
Protein structure
advances in the structure and chemistry of metallothioneins (Focused Review), 388
Proton transfer
ligand binding reveals protonation events at the active site of cytochrome *c* oxidase; is the K-pathway used for the transfer of H^+ or OH^-?, 335
P. stutzeri cytochrome c_4
sequential unfolding of the two-domain protein *Pseudomonas stutzeri* cytochrome c_4, 316
Pumping
ligand binding reveals protonation events at the active site of cytochrome *c* oxidase; is the K-pathway used for the transfer of H^+ or OH^-?, 335
Putidaredoxin
a scanning tunneling microscopy (STM) investigation of complex formation between cytochrome $P450_{cam}$ and putidaredoxin, 362
pK_a values
histidine pK_a values for the N-lobe of human transferrin: effect of substitution of binding site Asp by Ser (D63S), 403
Quantification
recent developments in quantification methods for metallothionein, 123
Quantum yield
aluminum corrolin, a novel chlorophyll analogue (Short Communication), 305
Rare earth
synthesis and photophysical study of highly luminescent coordination compounds of rare earth ions with thenoyltrifluoroacetonate and AZT, 87
Rat adipocyte
bis(6-ethylpicolinato)oxovanadium(IV) complex with normoglycemic activity in KK-A^y mice, 108
Rat metallothionein
investigation of metal complexes with metallothionein in rat tissues by hyphenated techniques, 197
Recombinant human metallothionein
copper speciation in the α and β domains of recombinant human metallothionein by electrospray ionization mass spectrometry, 153
Reduction potential
an outer-sphere hydrogen-bond network constrains copper coordination in blue proteins (Focused Review), 375
Repressor
role for zinc(II) in the copper(I) regulated protein CopY, 192

Resistance
application of metallothionein null cells to investigation of cadmium transport, 207
Resonance Raman spectroscopy
resonance Raman spectroscopy and density functional theoretical calculations of manganese corroles, 113
Resonance Raman
coordination geometry of Cu-porphyrin in Cu(II)–Fe(II) hybrid hemoglobins studied by Q-band EPR and resonance Raman spectroscopies, 310
Reversed-phase HPLC
investigation of metal complexes with metallothionein in rat tissues by hyphenated techniques, 197
RT-PCR
role of a copper-specific metallothionein of the blue crab, *Callinectes sapidus*, in copper metabolism associated with degradation and synthesis of hemocyanin, 228
Ru porphyrins
a supramolecular enzyme model catalyzing the central cleavage of carotenoids, 295
Scanning tunneling microscopy
a scanning tunneling microscopy (STM) investigation of complex formation between cytochrome $P450_{cam}$ and putidaredoxin, 362
Sequential unfolding
sequential unfolding of the two-domain protein *Pseudomonas stutzeri* cytochrome c_4, 316
Sialic acid
binding ability of sialic acid towards biological and toxic metal ions. NMR, potentiometric and spectroscopic study, 61
Spectroscopy
three new vanadyl(IV) complexes with non-steroidal anti-inflammatory drugs (Ibuprofen, Naproxen and Tolmetin). Bioactivity on osteoblast-like cells in culture, 94
Spectrum–Structure correlation
interaction of copper(II) with imidazole pyridine nitrogen-containing ligands in aqueous medium: a spectroscopic study, 37
Spermatogenesis
germ cell-specific nucleocytoplasmic shuttling protein, tesmin, responsive to heavy metal stress in mouse testes, 183
Stopped-flow fluorescence
kinetics of conformational changes induced by the binding of various metal ions to bovine α-lactalbumin, 69
Stress response
germ cell-specific nucleocytoplasmic shuttling protein, tesmin, responsive to heavy metal stress in mouse testes, 183
Structural models
(Catecholato)iron(III) complexes: structural and functional models for the catechol-bound iron(III) form of catechol dioxygenases (Focused Review), 284
Structure dynamics
advances in the structure and chemistry of metallothioneins (Focused Review), 388
Sulfonamide
crystal structure of [Cu(*N*-quinolin-8-yl-*p*-toluenesulfonamidate)$_2$]: study of its interaction with DNA and hydrogen peroxide, 101
Synthesis
synthesis of feralex a novel aluminum/iron chelating compound, 19
Template
the metal site as a template for the metalloprotein structure formation, 77
Template effect
the metal site as a template for the metalloprotein structure formation, 77
Template-mediated structural motif
the metal site as a template for the metalloprotein structure formation, 77
Tetrathiomolybdate
reduction of copper and metallothionein in *toxic milk* mice by tetrathiomolybdate, but not deferiprone, 213
Thenoyltrifluoroacetonate
synthesis and photophysical study of highly luminescent coordination compounds of rare earth ions with thenoyltrifluoroacetonate and AZT, 87
Thiazoles
antiproliferative activity of mixed-ligand dien-Cu(II) complexes with thiazole, thiazoline and imidazole derivatives, 25
Thiazoline
antiproliferative activity of mixed-ligand dien-Cu(II) complexes with thiazole, thiazoline and imidazole derivatives, 25
Thiol reactivity
advances in the structure and chemistry of metallothioneins (Focused Review), 388
Thiourea
^{13}C, ^{31}P and ^{15}N NMR studies of the ligand exchange reactions of auranofin and chloro(triethylphosphine)gold(I) with thiourea, 44
Toxic metals
binding ability of sialic acid towards biological and toxic metal ions. NMR, potentiometric and spectroscopic study, 61
Toxic milk mouse
reduction of copper and metallothionein in *toxic milk* mice by tetrathiomolybdate, but not deferiprone, 213
Transferrin
histidine pK_a values for the N-lobe of human transferrin: effect of substitution of binding site Asp by Ser (D63S), 403
Transport
application of metallothionein null cells to investigation of cadmium transport, 207
Triazamacrocycles
in vivo and in vitro ^{27}Al NMR studies of aluminum(III) chelates of triazacyclononane polycarboxylate ligands, 1
Ultraviolet spectroscopy
interaction of copper(II) with imidazole pyridine nitrogen-containing ligands in aqueous medium: a spectroscopic study, 37
Uncompetitive inhibition
interaction of anions with rat liver arginase: specific inhibitory effects of fluoride, 397
Unfolding
sequential unfolding of the two-domain protein *Pseudomonas stutzeri* cytochrome c_4, 316
Vanadyl complexes
three new vanadyl(IV) complexes with non-steroidal anti-inflammatory drugs (Ibuprofen, Naproxen and Tolmetin). Bioactivity on osteoblast-like cells in culture, 94
Vitamin A
a supramolecular enzyme model catalyzing the central cleavage of carotenoids, 295
Western blotting
role of a copper-specific metallothionein of the blue crab, *Callinectes sapidus*, in copper metabolism associated with degradation and synthesis of hemocyanin, 228
Wilson's disease
reduction of copper and metallothionein in *toxic milk* mice by tetrathiomolybdate, but not deferiprone, 213
X-ray structure
crystal packing and hydrogen bonding in platinum(II) nucleotide complexes: X-ray crystal structure of [Pt(MeSCH$_2$CH$_2$SMe)(5′-GMP-*N*7)$_2$]·6H$_2$O, 268
Zidovudine (AZT)
synthesis and photophysical study of highly luminescent coordination compounds of rare earth ions with thenoyltrifluoroacetonate and AZT, 87
Zn(II)
role for zinc(II) in the copper(I) regulated protein CopY, 192
